### Flame Retardant Potting Epoxy

TG-LH-FBPE-80U is a low viscosity, flame retardant and two-part flexible black potting compound based on epoxy resins. When fully cured the surface is glossy, blush free and hard. It has very good scratch and water resistance. This system has enhanced adhesion and wets glass, ceramics, most plastics and metals well. The mixed epoxy has low viscosity to ensure good flow, good seepage into every corner and minimal trapping of bubbles.
