

Zero Charge Screen & Keyboard Cleaner

1743

Techspray's ESD-safe products can help maintain work areas within the ANSI/ESDS20.20 standards set by the ESD Association (www.esda.com). In a static-free environment, the work area, tools and personnel form a circuit (see diagram to right). Electrostatic Discharge (ESD) occurs when the charges of two surfaces with a large electronic potential (difference) equalize instantaneously. The resulting discharge or spark can cause catastrophic or latent damage to electronic components. ESD programs maintain an equal potential by maintaining continuous contact with ground, avoiding ESD damage. Cleaners, lotions, and coatings are an integral part of an ESD control program.

Cleans surfaces and leaves behind dissipative residue

Removes hand oils, ink marks, dust, and other contaminants from computer equipment. With regular use, cleaner will eliminate static charge from sensitive surfaces and provide long-term static protection.

- Cleans plastic & glass
- Leaves ESD-safe coating
- Non-ozone depleting
- Leaves no insulative film
- Non-flammable
- Non-corrosive

Specifications:

- Meets or exceeds MIL-B-81705B
- NFPA 56A.
