

KONTAKTMASSA X

PRODUCT DESCRIPTION

Bostik Kontaktmassa X is used for improving heating properties between the cooling coils' copper valve and the wall of the inner boxes in freezers.

Bostik Kontaktmassa X is normally applied by using a hand gun with a twin nozzle, from a high-pressure pump with pressure plate, adaptable to a 200 litres drum.

TECHNICAL DATA

Type	Pumpable
Colour	Off-white
Odour	None
Durability	Min. 2 years
Dry solid content	100 %
Density	2.0 ± 0.1 g/cm ³
Thermal conductivity	0.70 W/m °K
Flammability	Non-flammable

SAFETY

For information, please see material safety data sheet.
