

### **Advanced Materials**

Arathane® 5816 PO

100 pbw

Arathane® 5816 IS

20 pbw

Polyurethane, halogen free, casting and impregnating system for processing and curing at room temperature. Soft multipurpose polyurethane system, grey color.

**Application** Transformers, filters, capacitors etc.

Processing methods Casting / Impregnating.

Manually or with automatic mixing and dosing

equipment.

**Key Properties** Halogen free system.

Good thermal shock resistance.

Flammability: UL 94 V-0.

## **Product Data (Guideline Values)**

#### Arathane® 5816 PO

Polyol, containing mineral filler.

Viscosity at 25°C	ISO 3219	mPa*s	3500 – 8000*	
Specific Gravity at 25°C	ISO 2811	g/cm <sup>3</sup>	1.48-1.62*	
Appearance	Visual	_	Grey viscous liquid*	
Arathane® 5816 IS Isocyanate.				
Viscosity at 25°C	PU / VIS-1	mPa*s	100-160*	
Specific Gravity at 25°C	ISO 1675	g/cm <sup>3</sup>	1.23	
Appearance				

<sup>\*</sup> Specified range

## **Processing Data (Guideline Values)**

#### **Mix Ratio**

Gel Time Viscosity and Curing						
Arathane®	5816 IS	Isocyanate	20	22		
Arathane®	5816 PO	Polyol	Parts by weight 100	Parts by volume 100		

Gel Time, Viscosity and Curing

Mix Viscosity at 40°C	Arathane® 5816 PO / IS	Rheomat	mPa*s	1400
Gel time at 30°C	Arathane® 5816 PO / IS	ISO 9396	min	15-25*
Pot life	Arathane® 5816 PO / IS	Rheomat	min	8-15
(Time to reach 5000 mPa*s) Minimum Curing Cycle 24 hours at RT or 6 hours at 60°C				

<sup>\*</sup> Specified range

# **Processing and Storage (Guideline Values)**

#### **Preparation**

Arathane® 5816 PO contains fillers, which tend to settle over time. It is therefore recommended to carefully homogenize the complete contents of the container before use.

In the storage vessels of the production equipment, the pre-filled products should be stirred up from time to time to avoid sedimentation and irregular metering.

### **Mixing**

The casting mix is best prepared by heating the resin up to 40 – 50 °C before stirring in the hardener. Brief degassing of the mix under 5 – 10 mbar vacuum improves the mixture homogeneity and enhances the dielectric properties of the castings.

#### Curina

To determine whether cross-linking has been carried to completion and the final properties are optimal. it is necessary to carry out relevant measurements on the actual object or to measure the glass transition temperature. Different gel and cure cycles in the customer's manufacturing process could lead to a different degree of crosslinking and thus a different glass transition temperature.

#### **Storage Conditions**

Store the components in a dry place according to the storage conditions stated on the label in tightly sealed original containers. Under these conditions, the shelf life will correspond to the expiry date stated on the label. After this date, the product may be processed only after reanalysis. Partly emptied containers should be tightly closed immediately after use.

Arathane® 5816 IS must be protected from moisture. Storage tanks should be blanketed with dry air or nitrogen. Storage at temperatures above 50°C is not recommeded, since this can lead to the formation of insoluble solids and also the viscosity buid-up increases on extended storage. Storage at low temperature is not recommeded because it may lead to some crystallisation. Crystallised material must be melted out immediately by short time heating. For information on waste disposal and hazardous products of decomposition in the event of a fire, refer to the Material Safety Data Sheets (MSDS) for these particular products.

# **Mechanical and Physical Properties (Guideline Values)**

Determined on standard test specimen at 23°C. Cured for 24h/RT + 6h/60°C. Huntsman Advanced Materials warrants only that its products meet the specifications agreed with the buyer. Typical properties, where stated, are to be considered as representative of current production and should not be treated as specifications.

The manufacture of materials is the subject of granted patents and patent applications; freedom to operate patented processes is not implied by this publication.

While all the information and recommendations in this publication are, to the best of our knowledge, information and belief, accurate at the date of publication, NOTHING HEREIN IS TO BE CONSTRUED AS A REPRESENTATION, WARRANTY OR CONDITION OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING WITHOUT LIMITATION, ANY WARRANTY OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, OR NONINFRINGEMENT OF ANY INTELLECTUAL PROPERTY RIGHT OF ANY THIRD PARTY.

IN ALL CASES, IT IS THE RESPONSIBILITY OF THE USER TO DETERMINE THE APPLICABILITY OF SUCH INFORMATION AND RECOMMENDATIONS AND THE SUITABILITY OF ANY PRODUCT FOR ITS OWN PARTICULAR PURPOSE.

The behaviour of the products referred to in this publication in manufacturing processes and their suitability in any given end-use environment are dependent upon various conditions such as chemical compatibility, temperature, and other variables, which are not known to Huntsman Advanced Materials. It is the responsibility of the user to evaluate the manufacturing circumstances and the final product under actual end-use requirements and to adequately advise and warn purchasers and users thereof.

Products may be toxic and require special precautions in handling. The user should obtain Safety Data Sheets from Huntsman Advanced Materials containing detailed information on toxicity, together with proper shipping, handling and storage procedures, and should comply with all applicable safety and environmental standards.

Hazards, toxicity and behaviour of the products may differ when used with other materials and are dependent on manufacturing circumstances or other processes. Such hazards, toxicity and behaviour should be determined by the user and made known to handlers, processors and end users.

Except where explicitly agreed in writing otherwise, the sale of product referred to in this publication is subject to the terms and conditions of sale of the Huntsman company from which you purchased the product (or those of the authorised distributor, as the case may be).

Huntsman Advanced Materials is an international business unit of Huntsman Corporation. Huntsman Advanced Materials trades through Huntsman affiliated companies in different countries including but not limited to Huntsman Advanced Materials LLC in the USA; Huntsman Advanced Materials (Europe) BVBA in Europe; and Huntsman Advanced Materials (Australia) Pty Ltd, Huntsman Advanced Materials (Hong Kong) Ltd, Huntsman Advanced Materials (Guangdong) Company Limited, Huntsman Advanced Materials (India) Pvt Ltd, Huntsman Japan KK, Huntsman Advanced Materials (Singapore) Pte Ltd and Huntsman Advanced Materials (Taiwan) Corporation in Asia Pacific.
