

## Photo-curing Adhesive for Camera Lens Bonding

### Product Description

GN728-20 is a photo-curing adhesive designed for camera lens bonding. This resin has good adhesion strength after the environmental test experiments. Additionally, this product can cure rapidly under the visible light and is suitable for bonding glass and plastics.

### Features

1. This resin has excellent toughness, good shock resistance and thermal shock resistance.
2. This product has good weather and age resistance
3. This resin is well suited for glass and plastic bonding.
4. This product complies to the 2011/ 65/EU RoHS regulations.

### Typical Uncured Properties

Appearance	GN728-20
Color	Liquid
Viscosity 25°C, S14 10rpm, cps	Opaque
Specific Gravity	4,500~10,000
Solvent Content, %	1.1
Heavy Metal Content, %	0
	0

### Typical Curing Properties

Recommended Wavelength, nm	310~365
Minimum Light Intensity, mW/cm <sup>2</sup>	> 50
Minimum Light Energy, mJ/cm <sup>2</sup>	1,000~2,000

### Direction of Use

1. Clean the contact surface until it is free of dirt, grease or mold release. Generally, a simple solvent wipe is sufficient.
2. For maximum bonding strength, please apply the adhesive evenly onto both surfaces that wish to be jointed.
3. Real curing time depends on various factors, such as part geometry, materials to be bonded, bondline thickness and efficiency of the UV light. Confirm the real curing time and conditions with actual production parts and equipment.
4. This product may cause skin irritation to sensitive personnel.

### Typical Cured Properties

Durometer Hardness, Shore D	65~69
Working Temperature Range, °C	-20~100

### Storage and Shelf Life

This product should avoid any direct light exposure. Replace the lid immediately after use to prevent possible light exposure. Shelf life of this product is one year when stored under shades, room temperature (14~34°C), and in sealed containers.

### Caution

Some findings indicate a lack of potential for carcinogenicity with the compositions of this product by long term recurrent application to the skin. However, contact with skin is likely to produce mild transient reddening. It is important to remove adhesive from skin with soap and water thoroughly. DO NOT use solvents for cleaning hands. This product is of moderate acute toxicity by swallowing. If swallowed, call a physician. Avoid contact with eyes. In case of contact, flush with water for at least 15 minutes and get medical attention immediately. For specific information on this product, consult the Material Safety Data Sheet.
